Santa Clara Pueblo Community Library Coding Club Information

What is it? Fiero is a coding software that teaches people of all ages how to code! You can build games and websites or simply learn more about computer literacy. Our very first coding club will run from August 1st- August 12th. You will receive one robot themed grab bag on Monday the 1st with STEAM activities from the Santa Fe Children's Museum, books on robots, and other hard-copy materials.

You can find information in two places on our website:
https://www.santaclarapueblocommunitylibrary.com/
1. About Us> Library Programs
2. Students & Families> Learn to Code (**We recommend starting here**)

FAQ:

- **How do I get started?**
  Go to "Learn to Code" under "Students & Families" and sign up with your email on the form. You will then receive an invite to create an account and be automatically added to our club. If you have already created an account please fill out the form so that we can invite you to the club within your Fiero account.

  Not interested in joining the club but want to learn to code? No problem! Just create an account through our website and begin your coding journey!

- **I need help with tech or have a question about the program, who do I contact?**
  Please contact our Media Specialist Lehua Bonderer at 505-692-6295
  (Ext 1248) or lbonderer@santaclarapueblo.org

- **How do I pick-up my robot bag?**
  We have an awesome kit for you with STEAM activities all based around robots, a book on robots, and other coding club materials. Our pick-up will be August 1st on the library proch. This way you will have all of your materials for the duration of the two-week long program. If you aren't able to collect your bag on August 1st please reach out to our library clerk Jeanette Teba at: Jteba@santaclaraplueblo.org to arrange an alternate pick-up time.
